Overview

- 1. Introduction
- 2. Growth of International Student Enrollment in Ontario
- 3. Analysis of First Year College Students
- 4. Analysis of College Graduates
- 5. Conclusions and Policy Implications

Why Study the Transfer Behaviour of International Students?

- International students have increasingly become an important part of post-secondary education in Canadian colleges and universities.
- The international student growth exceeds that of funded students in Ontario colleges.
- Little is known about the transfer behaviour of this growing group.
- This study is able to compare the transfer experiences of international students to that of their domestic peers.

Policy Backdrop

- Recent policy changes may have changed student transfer behaviour:
 - Creation of off-campus work permits in 2004 (from 2014 on they are no longer required)
 - Streamlining of applications for visas... longer durations approved, allowing for PSE transfer (2005)
 - Post Graduation Work Permit Program allows grads to work for 1 year (2005)
 - Workers to more easily become permanent residents through the "Canadian Experience Class" (2008)
 - Changes in promotion of Canadian PSE abroad...

See: Williams et al, 2015 for a more detailed summary on changes to international student visas.

Williams, K., Williams, G., Arbuckle, A., Walton-Roberts, M., & Hennebry, J. (2015). International Students in Ontario's Postsecondary Education System, 2000-2012: An evaluation of changing policies, populations and labour market entry processes. Toronto: Higher Education Quality Council of Ontario.

Enrollment Trends in Ontario

Domestic vs. International

International Student Growth in Ontario Colleges

Research Design

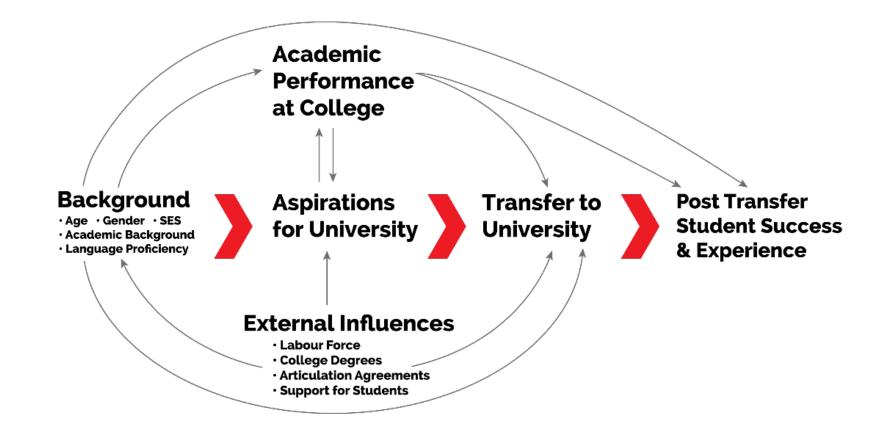

- 1. How do international and domestic students differ in Ontario colleges?
 - For those with a university credential, how do outcomes differ?
- 2. How does **college-to-university** transfer differ for international and domestic students in Ontario?

Project funded by the Ontario Council on Articulation and Transfer (ONCAT).This work is part of a larger province-wide study on transfer.

Influences on Student Transfer and Transfer Outcomes: A Framework

Data Sources

- The Student Satisfaction Survey (SSS) is an in-class survey administered to students in all programs enrolled in Ontario.
 - The survey addresses questions related to teaching, program, college services, and engagement.
 - Self-reported socio-demographic information, and student visa status (since 2011 only).
 - 65% of Ontario college students captured.
- The Ontario Graduate Satisfaction Survey (GSS) is a phone survey administered to all college graduates of a ministry approved program.
 - Contains administrative data on all graduates in Ontario (including Visa status).
 - Survey portion has response rate of 67%.
 - Graduates are asked questions about labour market outcomes, transfer, and questions pertaining to their experience.
 - Survey is administered 6 months after graduation.

Ontario Student Satisfaction Su	rvey (2011-20	Domestic Internatio			
	Total	Domestic	International		
Total Non-unique Observations in SSS (2011-2014)	539,656	-	-

International Students Report Being More Satisfied With Transfer Experience

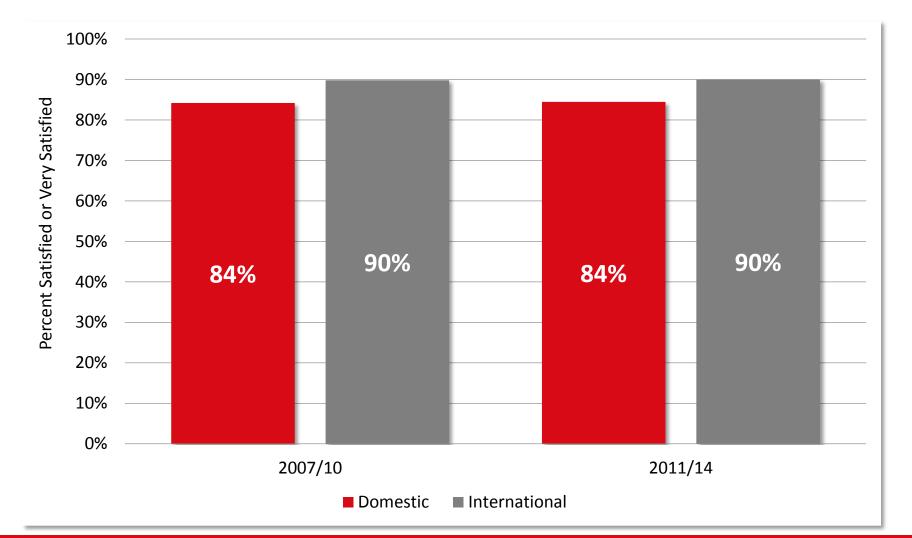

How Satisfied With Academic Preparation for Current Program of Study?

FOR RE.C

Seneca

OENT MOB

CENTAR

Summary of Results

- International students are becoming a much larger share of the college population.
- International students are attracted to business programs.
- Almost half of international students with a university degree are selecting into non-grad certificate programs.
- Relative to domestic students, international students are coming in with higher levels of education (specifically university degrees).
- More international students are working for pay and fewer are transferring to university after graduation.

Summary of Results Continued

- Unemployment rates have increased in general for graduates; international students have significantly higher unemployment rates.
- Transfer rates for international graduates are lower than that of their peers, and transfer rates are declining over time.
- International students have higher levels of satisfaction with their transfer experience.
- International students report getting more transfer information from the college, and less from family.

Conclusions

- Because international students are rapidly becoming a larger group within the PSE system, and policy makers need to be receptive and responsive to the needs to this group.
- International students have different characteristics than their peers.
- International students are more likely to use college resources for transfer information and so the college needs to ensure they are serving the needs of these students.
- Given the higher unemployment rate among international graduates, colleges need to investigate how to improve employment outcomes for these graduates.
- Transfer rates to university are dropping for international students, and more work is needed to understand if this is a result of changes to visa rules.

Thank You!
